What is the ecosystem
Frogans technology: A new software layer on the Internet

The three operating layers of the Internet

**Generic applications**
- E-mail, FTP, IRC, World Wide Web

**Traffic and routing**
- Domain Name System (DNS)
- Internet protocols and standards

**Telecommunications infrastructure**
- Physical network

<thead>
<tr>
<th>The 4 permanent objectives of the Frogans project</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Balancing relations between Frogans site publishers and end users</strong></td>
</tr>
<tr>
<td>The Frogans project aims to provide new ideas and solutions that respect end-user interests, including their privacy, while regularly presenting new additional and creative functionalities to Frogans site publishers.</td>
</tr>
<tr>
<td><strong>Assuring that the Frogans technology remains both secure and simple</strong></td>
</tr>
<tr>
<td>The Frogans project aims to continuously innovate, while assuring that no decision, at any level, will undermine the essential characteristics of the Frogans technology: its security and its simplicity.</td>
</tr>
<tr>
<td><strong>Elaborating specifications, implementations and policies as a coherent whole</strong></td>
</tr>
<tr>
<td>The Frogans Project aims to ensure the stability of the Frogans technology for all its users throughout the world, by elaborating in a coherent manner its technical specifications, its reference implementations and its policies.</td>
</tr>
<tr>
<td><strong>Fostering employment, innovation and economic development</strong></td>
</tr>
<tr>
<td>The Frogans project aims that an ecosystem flourish on top of the Frogans technology, by providing all stakeholders, including entrepreneurs, with an open, stable and durable environment for developing and successfully managing their activities.</td>
</tr>
