

Resolution of Frogans Addresses

Challenges the FCR Operator must overcome

FCR (Frogans Core Registry)

Database containing all registered Frogans addresses

- Millions of publishers of Frogans sites

FNS (Frogans Network System)

Worldwide system made up of FNS servers used to deliver FNS records

- Billions of end users

How to Solve FNS Challenges

- Work with worldwide Internet operators (e.g. Level 3 Communications)
- Use heavy-duty servers (high capacity and efficient)

STG Interactive's FNS Servers

`usa-nyc-l3a-fns-01-srv-01-01.fns.fcr.frogans`

Designed and assembled in Paris

2U

750 GB PCIe Flash

32 GB RAM

10 x 1GB port

2x Multi-threaded 6-Core CPU

10k Linux server

Scalability leverages

Servers per Data Centers
